

Capture, Edit and Create
HDV
In Realtime!

EDIOUS NX for HDV

Let EDIOUS NX for HDV take you to the world of High Definition video production. With its seamless realtime workflow using any mix of HD and SD video formats, editors can work with unlimited realtime video, audio, titles, graphics and effects layers, while always previewing projects in high-quality, full resolution HD and SD video.

Unmatched Realtime Editing

- Realtime mixed format editing of HD, HDV, DV, MPEG-2, uncompressed and lossless video with EDIOUS Pro3 editing software
- Realtime HD / SD resolution, aspect ratio (16:9 / 4:3) and frame rate (NTSC / PAL) conversion and output
- High-quality analog & digital inputs / outputs for DV, S-Video, RCA (composite) video & unbalanced audio
- Realtime, full resolution, full quality component HD and SD video output
- Hardware-based video overlay design for accelerated HD / SD editing
- Filtering & noise reduction technology for analog input
- Future-proof codec and performance scalability

The First Canopus MediaEdge2 system in Malaysia!

MediaEdge2 - LAN-based Video Distribution System provides a multi-channel, multi-location video delivery solution using standard TCP/IP networks and display devices. MediaEdge offers a cost-effective method of distributing video content, MPEG-1, MPEG-2 & MPEG-4 to multiple PC and set-top box clients. Flexible content delivery capabilities include pre-programmed playback, live streaming of video broadcasts and full-featured interactive video-on-demand services. MediaEdge2 sets the standard for low-cost video distribution and is ideal for point-of-sale, educational, corporate and other video retrieval and display applications.

The first MediaEdge2 system in Malaysia is located in One Utama Shopping Center, Petaling Jaya where it is being used to schedule daily broadcast of video streams from 10am to 10pm to 100+ units of Samsung 42" Plasma TV.
