

GOOD NEWS FOR AVCHD & AVCCAM USERS!!

EDIUS Neo 2 Booster Realtime AVCHD Editing Solution, Blu-ray Disc Authoring... and more!

Introducing...
**Grass Valley EDIUS Neo 2
with AVCHD Booster Option**
The Perfect Solution for Editing AVCHD

Native AVCHD files have previously been difficult to edit with NLE software, due to the high compression of the video, and often required dedicated hardware solutions.

The new EDIUS Neo 2 Booster allows for smooth, full-frame editing of native AVCHD video in software only, courtesy of a newly-developed AVCHD codec engine that can process more than 3 or more real-time native AVCHD streams simultaneously with EDIUS Neo 2 Booster (Verified in Grass Valley Canopus tests on computers with Core i7 processors).

Grass Valley EDIUS Neo 2 with AVCHD Booster option is an affordable NLE software featuring basic, entry-level range of tools and features, EDIUS Neo 2 software is perfect for those new to video editing. Yet it also provides powerful nonlinear editing features common to all EDIUS solutions, such as real-time, multi-track, mixed-format HD/SD editing, chroma keying, titling, and Blu-ray Disc and DVD authoring. Built on the same highly-acclaimed technology as the EDIUS editing software, EDIUS Neo 2 offers native editing of various formats including AVCHD, HDV, DV, Windows Media, and QuickTime — and provides a seamless, real-time workflow that supports the mixing of all formats within the same timeline.

The EDIUS Neo 2 Booster makes real-time AVCHD editing an affordable reality and enhances Grass Valley's commitment to the real-time "anything in – anything out" editing platform. The EDIUS Neo 2 Booster is compatible with Windows XP, Vista (32-bit/64-bit) as well as 32-bit and 64-bit versions of the new Windows 7 Operating System.

EDIUS Neo 2 Booster runs on a laptop as well as a workstation system and can input/output video from any OHCI FireWire (IEEE 1394)-compatible hardware. If you need HDMI and audio monitoring or Blu-ray Disc acceleration support, take a look at the HDSPARK™ and FIRECODER® Blu as hardware options that complements EDIUS Neo 2 Booster.

EDIUS Neo 2 Booster is available for RM999

EDIUS Neo 2 Booster Upgrade is priced at RM299

FREE EDIUS Neo 2!!
