

Grass Valley EDIUS[®] 6 has arrived in Malaysia!

10-bit Editing • 2K/4K Resolution • Free-shape Mask Filter • 16 Camera Multicam Editing
Proxy Mode Workflow • Canon XF & EOS movie format support • AVCHD Exporter to media card

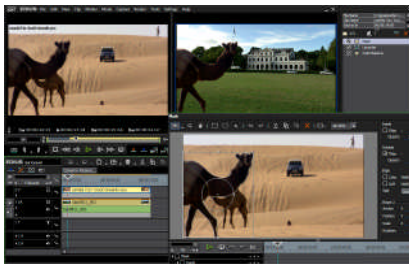

Grass Valley™ EDIUS[®] 6, STORM™ 3G and STORM™ 3G Elite are now available in Malaysia. No other NLE gives you so much versatility combined with sheer speed of editing. EDIUS[®] supports real-time editing of all popular standard-definition (SD) and high-definition (HD) formats. **'Edit anything'** is EDIUS[®] 6 tagline.

The EDIUS system's renowned, mixed format and file wrapper/codec agnostic timeline has been enhanced in EDIUS 6 **to include 1080p50/60, 10-bit support, with up to 4K resolution, and features the fastest native AVCHD editing in the industry.** This includes the ability to edit video content captured with digital SLR cameras such as the Canon EOS. In addition users are able to preview effects in real time.

EDIUS 6 also extends its editing functionality towards post-production applications with **16 Multicam editing, vector-based and track matte keyer video masking, and improved After Effects plug-in support.**

Grass Valley™ EDIUS[®] 6 currently supports the following Grass Valley hardware: **HDSpark, HDStorm Plus, HDThunder/STORM™ 3G and STORM™ 3G Elite.**

Grass Valley™ EDIUS[®] 6 (Full version)
is priced at **RM2,899**

Grass Valley™ EDIUS[®] 6 upgrade version
is priced at **RM1,399**

from all previous version (EDIUS version 1 – version 5)
Promotion valid up to 31st December 2010

We would like to invite all EDIUS users to our showroom to see the power & capabilities of the latest version of EDIUS video editing solutions.

Please call us or email us for the best date & time.

STORM™ 3G Series - Any In, Any Out, High-Performance Multi-Format Editing

The Grass Valley™ STORM™ 3G Series of 1080p-capable editing interface products brings the entire video editing experience to the next level and ships with EDIUS[®] 6.

The STORM™ Series consists of two models: the STORM™ 3G Elite comprehensively-equipped with every interface you could ever need, and the affordable yet powerful STORM™ 3G.

STORM™ 3G Elite consists of an external breakout box with a PCIe 4x interface card for desktop connection (4X mode provides enough bandwidth to handle up to 1080p) as well as an Express 34 card (1X mode: up to 1080i50/60) for connection to a laptop.

STORM™ 3G Elite video interfaces include dual 3G SDI (which can be used as either two independent 3G SDI (1080p50/60) outputs or one pair identical SDI signals one of which features selectable real time down conversion), HDMI I/O (1080p capable), composite (SD only), and component (up to 1080i) analog video I/O. STORM™ 3G Elite has two RS-422 interfaces (for controlling a VTR as master and another for control of a slave), Linear timecode I/O, reference in/through/out interfaces (which accept both bi-sync and tri-sync level), and a locking power connector

STORM™ 3G Elite and STORM™ 3G represent the higher end of the EDIUS editing hardware line-up. With 1080p 50/60 capability and 10-bit picture quality, coupled with second-to-none real-time multilayered, mixed codec editing performance from EDIUS 6, the STORM™ 3G Series meets the highest demands of any episodic video editing suite. STORM™ 3G Elite is the successor to EDIUS HD, while STORM™ 3G replaces HDTHUNDER.
