

2015 NAB Show Highlight

Exhibits April 13 – 16, 2015

Las Vegas Convention Center, Las Vegas, Nevada USA

Datavideo

booth: **SL9716**

There will be quite a number of new Datavideo products to be launched in NAB 2015, such as **SE-700** (6-Ch HD-SDI & HDMI Switcher), **SE-1200** (6-Ch HD/SD-SDI & HDMI Switcher), **HRS-30** (Hand Carry HD Recorder/Player with built-in LED Monitor), **DAC-50S** (improved version of DAC-50), **NVS-25** (advanced H.264 Video Streaming Server/Recorder), **CG-250** character generator, **OBV-2800CCU** and its relevant accessories such as camera control unit, CCU cables. Come and discover the whole range of Datavideo products at Las Vegas Convention Center.

Imagine Communications

booth: **N2702**

On April 7, 2014, Imagine Communications acquired Digital Rapids and will be showcasing Digital Rapids products rebranded as:

SelenioFlex™ Live (StreamZ Server) software-based solutions support HEVC compression, Ultra HD and adaptive bit rate streaming support, enabling operators to reach audiences with superior-quality, live viewing experiences across the broadest range of devices.

Zenium™ (Kayak) provides an agile software engine that enables broadcasters and service providers to quickly adapt their workflows to capitalize on new service opportunities and simplify their management.

EditShare

booth: **SL10510**

EditShare raises the bar for Collaboration and Media Management with new "Enterprise-Class" Storage and Production MAM offerings.

XStream EFS is the world's most affordable enterprise-class, distributed and redundant "scale out" storage platform, offering unmatched performance and resiliency for real-time workflows, such as project sharing, combined with blazing-fast performance, multiple levels of redundancy and tremendous scalability.

Flow 3.2 release features new format support (expanded support for 4K codecs and single-file-per-frame formats (DPX & CinemaDNG)), remote collaboration and automation capabilities, a "High Availability" database option, and other enhancements that help facilities build a more efficient production pipe (Eg: download capabilities that expand the remote collaboration power of AirFlow).

Grass Valley Belden

booth: **SL206**

At NAB 2015, Grass Valley are rolling out an array of solutions that answer your questions about IP, 4K & Cloud solutions - so you can start benefitting from the flexibility and agility this technology has to offer. Grass Valley in NAB 2015 will feature live demonstrations and presentations that answer your questions on how to be **more efficient** and **keep viewers engaged**.

- **EDIUS 7** Multi-format Nonlinear Editing Software, which is already capable of handling 4K and 8K content.
- **T2** Intelligent Digital Disk Recorders, combining advanced nonlinear production features with VTR-like controls, with multiple playback/record channels. With 2 units of T2 iDDRs, you have 4K video layout.

BroadStream Solutions (OASYS)

booth: **N3118**

BroadStream Solutions will showcase the full suite of broadcast solutions at this year's NAB 2015 show. This will include **OASYS** Integrated Payout, **CURRENT** News Workflow, **HARBOR** Video Server with Automation and **ARMADA** our fleet of apps for specialized tasks and enhanced integrations.

BroadStream Solutions' OASYS, CURRENT, HARBOR and ARMADA solutions will be available for demonstration at NAB2015 in the North Hall Booth N3118 beginning April 13 – April 16, 2015.
