

Christmas Special Offer

Datavideo's most popular converter: **DAC-70** is now on offer at **RM2,500** saving **RM200** during the month of December 2015.

Datavideo DAC-70 up/down/cross converter is designed to convert video signals from VGA, HDMI, SDI with Audio input to 3G/HD/SD-SDI & HDMI outputs.

Perfect for connecting a VGA/HDMI output from computer to SDI devices over long distance SDI cable. Solutions for lecture theater, houses of worship, auditorium room and conference hall.

DAC-70 is able to cross convert from 60/59.94 to 50, from interlace to progressive signal, Standard Definition to High Definition or vice versa

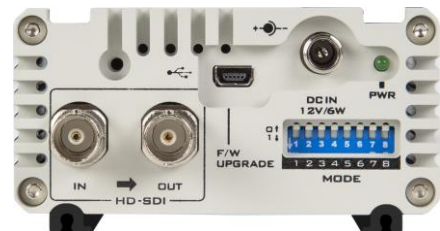

Datavideo's latest converter: **DAC-50S** converts 3G/HD-SDI video to one of the following analogue outputs:

- 1 x component (YUV) output & 1 x composite (CV) output including stereo audio
- 1 x S-Video (Y/C) output & 2 x composite (CV) outputs including stereo audio

The DAC-50S down scales the signal for the analogue output. The DAC-50S also provides an SDI Loop-thru output. It further outputs one pair of analogue audio channels selected from 16 de-embedded SDI audio channels (Selection is determined by DIP switch settings).

The DAC-50S is housed in a rugged aluminum frame, making it durable enough to endure the roughest conditions. Ideal for use with RMK-2 (Rackmount kit) and also MB-4 Battery holder.

This promotion valid from 1st to 31th December 2015
