

Grass Valley EDIUS Neo 2 is HERE!!

There are two versions of EDIUS - the full version and **EDIUS NEO**. Grass Valley EDIUS Neo 2 is exactly the same program as the full EDIUS but without some of the more advance features. EDIUS Neo 2 may do everything that you need for editing and now with support to the Grass Valley HDSPARK and FireCoder Blu you can watch your edits in full HD and export quickly to Blu-ray and DVD.

EDIUS strengths are its stability and realtime performance and you get exactly the same with EDIUS Neo 2. EDIUS Neo 2 also has EDIUS' multi-track timeline, mixed-format HD/SD editing, excellent realtime chromakeying, titling using EDIUS' QuickTitrer which can do realtime rolling and crawling titles as well as DVD authoring.

Using the Grass Valley FIRECODER Blu board you can export quickly to Blu-ray from the EDIUS Neo 2 timeline. Also with EDIUS Neo 2 you can use the Grass Valley **HDSPARK** PCI Express board that gives you real-time HDMI output so you can see you editing in full HD on a decent screen. EDIUS Neo 2 does not support other Grass Valley hardware, such as the HDSTORM and HDTHUNDER, but you do not really need inputs with most of the modern tapeless AVCHD or HDV cameras so it will not be an issue.

EDIUS Neo 2 also includes the new range of 3D GPU based transitions that were first seen in EDIUS 5. These add exciting effects such as page wipes, bouncing balls and explosions. Also new in EDIUS Neo 2 is the animatable layout tool. This lets you easily crop and does animated picture in picture effects with your video or stills. It also maintains the quality of any high-resolution stills as you pan around them making it great for image montages.

EDIUS Neo 2 supports **AVCHD**, **HDV**, **AVI** and **QuickTime** files and **Windows Media** on the timeline. It does not support **Panasonic DVCPro HD**, **Sony XDCamHD** or **XDCam-EX** and various other high-end formats. For these you need to get the full version of EDIUS.

EDIUS Neo 2 is available for RM999.

Latest News!!

**From May 2009 until March 2010,
Panasonic will bundle AVCCAM series camera
(AG-HMC72EN & AG-HMC152EN)
